THROUGH
INNOVATIVE TECHNOLOGY**

OUR FRESH TECHNOLOGIES

Exclusive Sales, Service and Support for groundbreaking technologies used to clean, disinfect, and sanitize the spaces we use, the air we breathe and the food we eat!

ON-SITE, ON-DEMAND

SALTWATER BIOCIDES

ON-SITE, ON-DEMAND GENERATION OF CLEANERS, SANITIZERS AND DISINFECTANTS WHICH ARE POWERFUL, SAFE, AND ECO-FRIENDLY FOR PENNIES

Where Sustainability Meets Performance

USING THE POWER OF MOTHER NATURE- ON-SITE, ON-DEMAND GENERATION OF AQUEOUS OZONE. A ECO-FRIENDLY SANITIZER AND CLEANER USED FOR EVERYDAY CLEANING AND ICE PRODUCTION

LEADER IN DRY MISTING 2-3 MICRON WATER DROPLETS TO REDUCE FOOD WASTE THROUGHOUT THE SUPPLY CHAIN BY INCREASING HYDRATION AND MINIMIZING MICROBIALS

FreshTech
SOLUTIONS, LLC

FRESHTECHSOLUTIONS.COM

Did you know that more than 40% of the world's crops end up as food waste? Did you know that this is mainly due to improper post-harvest hydration through the supply chain? Much of the nutrient value, quality, and taste is also lost through this process. Consumers deserve better!

Inspired by mother nature, Contronics Dry Misting uses ultrasonic nebulizing technology to create a dry mist (fog) consisting of 2-3 micron water droplets. FOG is the most effective way to properly hydrate plants, fruits, and vegetables from postharvest through Retail Display. Contronics Dry Misting is the only complete supply chain solution, delivering a fresher fresh and reducing food waste!

DRY MIST (FOG) CAN BE USED IN MULTIPLE APPLICATIONS

- **Retail Display Cases Including**
 - **Wet or Dry Produce**
 - **Fresh Meat**
 - **Fresh Seafood**
 - **Floral**
- **Cold Storage**
- **Combine with a human and food safe biocide to also remove mold, bacteria, and viruses (Including Covid-19) from the air!**

HOW IT WORKS

-  **1** Cold fresh water is combined with
-  **2** pure crystal salt purchased from your local home goods stores to create perfectly balanced brine water
-  **3** Brine water is put through Saltwater Biocides' patented, gravity fed, 12v power, electrolysis process to create:

AQUEOUS OZONE

SANITIZER, CLEANER & DEODORIZER

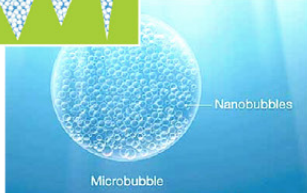

The extra oxygen atom attacks and completely destroys contaminants

- **Patented Technology**
- **Infuses OZONE GAS into tap water**
- **CLEANS**
- **SANITIZES**
- **DEODORIZES**
- **Nano Bubble Technology**
- **Converts back into AIR & WATER**

CCS1000 ICE UNIT

PRODUCE CLEAN ICE

- Establishes a pro-active ice machine safety program
- Provides Bottled Water Quality Ice
- Prevents slime build-up (bio film) in the cool environment of the ice machine
- Prevents bacteria and mold growth such as: Listeria, Salmonella, E Coli, Norwalk Virus and Shigella
- Decreases preventative maintenance schedules
- Remove costly and unsanitary filter systems

COMMERCIAL ICE MACHINES LINKED TO NOSOCOMIAL INFECTIONS
